NOTICE OF PUBLIC HEARING
concerning

**ADOPTION OF WASTE DISCHARGE REQUIREMENTS
AND
NEW NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM PERMIT
(NPDES NO. CA0085308)
FOR
CITY OF ATWATER
ATWATER REGIONAL WASTEWATER TREATMENT FACILITY
MERCED COUNTY**

The City of Atwater (City) applied for a National Pollutant Discharge Elimination System (NPDES) permit to discharge up to 6.0 million gallons per day of disinfected tertiary-treated wastewater from its new Atwater Regional Wastewater Treatment Facility (Regional Facility) at 530 South Bert Crane Road. The City is constructing the Regional Facility to replace its existing Atwater Wastewater Treatment Plant to comply with more stringent effluent limitations. The Regional Facility will discharge its treated wastewater to Peck Drain, which is a man-made extension of Atwater Drain. Peck/Atwater Drain is hydraulically connected to the San Joaquin River, a water of the United States. The existing Atwater Wastewater Treatment Plant currently discharges to Atwater Drain approximately six miles upstream of the proposed discharge location pursuant to Waste Discharge Requirements (WDRs) Order R5-2007-0063 (NPDES Permit No. CA0079197) and Time Schedule Order R5-2010-0903. The City intends to decommission the existing Atwater Wastewater Treatment Plant at which time the WDRs/NPDES permit and time schedule order will be rescinded.

The Central Valley Regional Water Quality Control Board (Central Valley Water Board) will consider adoption of the new WDRs/NPDES permit. The proposed WDRs/NPDES permit include final effluent limitations for biochemical oxygen demand (BOD), total suspended solids (TSS), BOD and TSS percent removal, pH, copper, lead, zinc, ammonia (as N), nitrate plus nitrite (as N), total residual chlorine, total coliform, and acute whole effluent toxicity.

A public hearing concerning this matter will be held during the Central Valley Water Board meeting which is scheduled for:
